SASB Delta Series

The SASB Delta Series:

These unique events will unveil each sector's standards, providing a detailed look of the material issues, standards for disclosure, and overall results of the standards setting process. Expert speakers and panelists engage in a frank dialogue about the specific issues for the sector. These intimate gatherings provide an opportunity for working group members to network and contribute to a dialogue on what defines materiality for the sector.

The Delta Series:

Examines SASB's new sustainability standards as they emerge from each industry working group.

Educates corporate, financial, accounting and sustainability practitioners about what the new standards mean to their industries and how to implement them.

Informs investors about how to interpret the standards and how to use them to evaluate potential investments.

Inspires attendees about improved transparency, and how it contributes to a future with a sustainable economy.
