### Which country was the world's leader in renewable energy use in 2014?

What impact did the US shale boom have in 2014? Did CO2 emissions rise or fall? Has slower economic growth in China and other emerging markets had an impact on energy consumption?

To find out the answers to these questions join us for a live webcast marking the publication of the 64th edition of the BP Statistical Review of World Energy 2015 on Wednesday 10 June 2015.

Statistical Review of World Energy

---

Wednesday 10 June 2015  
 10:00am BST

The [Statistical Review of World Energy](#) takes a comprehensive look at global energy production, consumption, trade, reserves and prices in 2014 alongside historical data, providing an objective overview that can help us understand how the energy landscape is changing.

Our launch webcast will be hosted by BP group chief executive, Bob Dudley and group chief economist, Spencer Dale. The presentations are followed by a question and answer session. Register for the webcast and post your questions for the Q&A session now.
