Keynote Speaker:

Dennis Goett is a seasoned professional with over 40 years of experience in strategic planning, management and finance. He has served as a commercial banking c

Treasury executive at an AMEX-listed finance and leasing company, and as Treasurer at a NYSE-listed financial services firm. His expertise lies in capital formation and strategic use and alignment of capital. Dennis has had considerable success in financial management, capital formation, governance, finance, corporate development, risk management, and administration. Dennis initiated and managed public and private debt and equity offerings, raising over \$7 billion during the course of his career.

Dennis is a graduate of Fordham University. He lives in North Salem, New York with his wife, Deborah. He has 4 children and 9 grandchildren.

Presenting Companies:

[Voltaiq](#) provides a Battery Intelligence software platform for rapid, powerful analysis of battery data independent of the source; whether it be in-field, or in-lab from commercial testers. The comprehensive and common platform enables instant access, insight and learning from an organization's entire body of data, speeding development cycles through quicker, more confident decisions. Voltaiq helps you ship products faster and ensure quality and reliability in the field, transforming your battery performance into a competitive advantage.

[Noveda Technologies](#), Inc. develops and provides Web-based energy monitoring solutions for conventional and renewable energy systems. The company's products include SunFlow Monitor, a tool that provides real-time monitoring of renewable energy production and use; EnergyFlow Monitor, a tool that provides real-time energy monitoring and management capabilities to assist user to optimize building performance and move forward to net-zero energy; Carbon Footprint Monitor, a tool that engages in real-time monitoring of the carbon footprint and displays real-time impact of facility on the environment; and a real-time water monitoring platform.
