“In passionate pursuit of Corporate & Operational Efficiency”
Energy Management:

A global platform for energy management:

- Potential for significant costs savings (6% to 30%)
- Tax incentives (ECA – 100%)
- Reduction in CO2 emissions
- Reduction in carbon taxation (CRC)
- Reduction in carbon taxation – future liability, potential

- Revenue Generation from Feed in Tariffs
- Revenue generation from Power Balancing
- Potential to access grant funding

“In passionate pursuit of Corporate & Operational Efficiency”
Did you know that motivated employees are 16 times more effective than demotivated employees?

- Reduced absenteeism
- Reduce time wasted dealing with related issues (poor performance)
- Reduce staff turnover

Managing motivation is a requirement for productivity:

- Increase effort - increase productivity
- Increase synergy - increase co-operation in the workplace
- Increase satisfaction - increase quality of work
- Increase team performance – reduce costs, improve profitability

“In passionate pursuit of Corporate & Operational Efficiency”
Process:

• Process Efficiency Tools focuses on:-

  • The identification and elimination of all forms of waste
  • Team Based Problem Solving
  • A structured approach, which includes the use of basic improvement tools
  • Leading to reductions in waste, potentially improved organisational performance
  • The identification of the strategists that need to be undertaken to motivate employees to perform at their best

“In passionate pursuit of Corporate & Operational Efficiency”
