An example of the use of Energy Points

Source: Zilk EnergyPoints, Inc. Data

- eGrid 2011, National Oceanic & Atmospheric Administration (NOAA), USG
- 1 EP (Energy Point) = 1 gallon of gasoline
- EPG means "Electricity Per Gallon" of gasoline
- Print Date: 7/12/2012

Efficiency is based on the resource mix. The proportional circles and labels represent the EPG (electricity per gallon). The arrows indicate the flow of electricity across regions. The vertical bar shows transmission and distribution losses as a percentage.
