

W2C | DATA BLUEPRINT ACCELERATE | INTRODUCTION

Leveraging blockchain, artificial intelligence & big data to link financial & sustainability impacts throughout the value chain

Glenn Frommer
(Reporting 3.0)

The logo for 'reporting 3.0' is rendered in a dotted, pixelated font. The word 'reporting' is on the top line and '3.0' is on the bottom line. The background of the slide features a network diagram with nodes of various colors (blue, orange, green, black) connected by thin grey lines.A smaller version of the 'reporting 3.0' logo, also in a dotted font, located in the top right corner of the slide.

Blueprint Series 2016/2017

Blueprint 3: Data

Data integration, contextualization &
activation for multicapital accounting

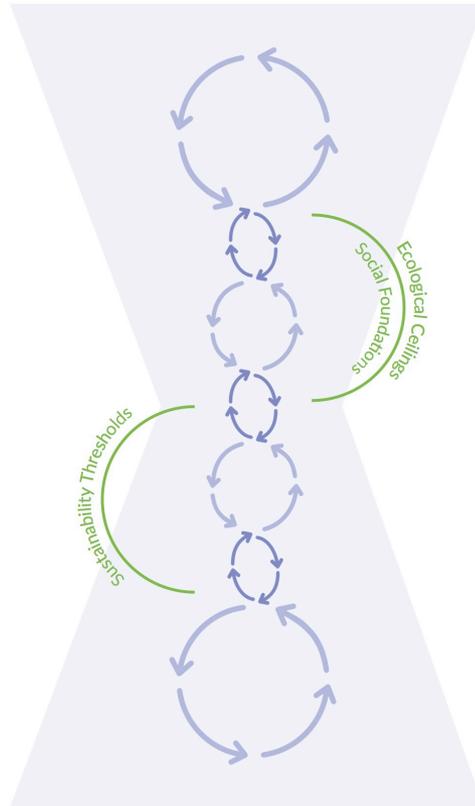

Blueprint Report | Final Version 1.0 | 30 May 2017
Lead Author: Bill Baue | Reporting 3.0

Chapter 6: Activation & Acceleration – Catalyzing context-driven stakeholders

In Meadows' vision, **truly integral information systems** do three things. They

- **Integrate** the multiple capitals to link Ultimate Means (natural capital) through Ultimate Ends (well-being);
- **Contextualize** company impacts on the carrying capacities of the capitals; and
- **Activate** responses when the sustainability of any capitals – and hence the potential for biota well-being and human fulfillment – is placed at significant risk.

DALY HOURGLASS

LEGEND
 — Capital Flows
 — Capital Stocks

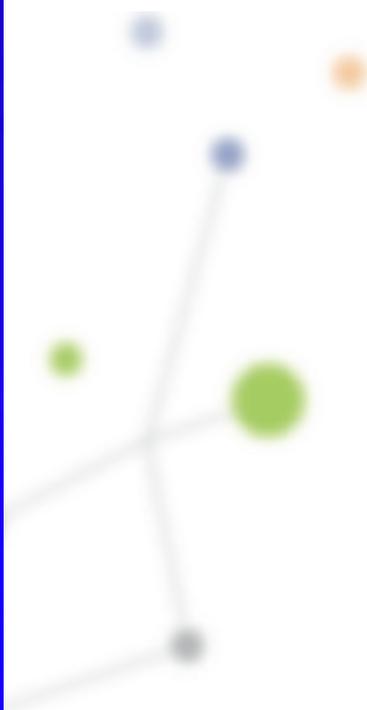

The information system... will measure capital stocks at every level and the flows that increase, decrease and connect these stocks. [S]ustainability indicators should be related to carrying capacity or to threshold of danger or to targets.

My particular interest,
since I first heard
about the Platform,
has been in helping
Reporting 3.0 **activate**
evidence-based
stakeholder advocacy
that uses **data from**
corporate reports to
contextualize the
sustainability of
company
performance

Recommendations in Chapter 6

3 Maturities:

- Educate
- Advocate
- Accelerate

4 Constituencies:

- Reporting Standard Setters
- Corporations
- Governments & Multilaterals
- Investors

Stage	Recommendation
Educate	1 – Identify opportunities to activate sustainability progress within direct spheres of influence
	2 – Identify opportunities to catalyze sustainability progress through indirect spheres of influence
Advocate	1 - Harmonize context-based <u>multicapital</u> data across geographic scopes, from global to national to regional to local
	2 - Reconcile / harmonize between public sector and private sector approaches and methodologies for <u>multicapital</u> contextualized data
	3 – Use open data platforms to display & benchmark company-level performance across multiple capitals against sustainability thresholds
	4 – NGOs should embrace evidence-based, context-driven advocacy, and investors should embrace forceful stewardship
Accelerate	1 – Investors can drive demand for <u>multicapital</u> , context-based <u>blockchain</u> implementations that track financial & sustainability performance across value chains
	2 – Track regional sustainability impacts using <u>blockchain</u> implementations that enact smart social contracts for preserving common capital resources
	3 – Set more aggressive goals than simply aligning with sustainability thresholds to build buffer zones
	4 - Support <2°C scenario analysis and transition planning to <2°C business models

Overview Workshop 2C – The Data Blueprint

Programme:

- 0 min: Introduction
- 10min: Presentations focusing on Process, Success and Scalability
- 35min: Q&A between panel participants
- 50min: Questions from the plenum
- 65min: Round-up with focus on core recommendations
- 75min: End

Speakers:

- Niels Faber, Radboud University – *Blockchain as a crowbar for sustainability*
- Jiro Olcott, Guard Global – *Automating use of blockchain for reporting*
- Anne Huibrechtse, Deloitte – *Contextualizing data usage and its reporting*

Session context and focus questions:

- **Clear focus on the Data Blueprint**
- **Strong emphasis on sustainability context (links between micro, meso, macro)**
- **How do we validate the data we use, and how do we empower that data to be used?**
- **What is the role of blockchain technology, and technology more broadly?**
- **How do we accelerate the pace and scale of change?**
