Don't let these protections go up in smoke.

Time is running out to
fight back.

Take action»

We spent years putting these protections into place. Hundreds of thousands of EDF supporters—and millions of Americans in total—overwhelmed federal agencies with demands for action. And we saw results.

Now, the Trump Administration is working to undermine 2 critical victories—and we need your help to fight back:

- First, the Department of Interior announced they were working to **unravel much-needed limits on the amount of natural gas the oil & gas industry is allowed to waste** through venting, leaking, and burning off (in a process called "flaring") on our public and tribal lands.
- **Then, EPA Administrator Scott Pruitt announced a proposal to repeal the Clean Power Plan**—America's first-ever national limits on the carbon pollution spewing from our fossil fuel-fired power plants

But we have a limited amount of time to fight back: Add your name in support of both of these crucial protections today, before it's too late!

Put simply, with these actions the Trump Administration is ignoring the will of the people.

The clear majority of Americans want to see action on climate. Faith organizations, health associations, and at least 75 mayors, state governors, and attorneys general who represent nearly half of the U.S. population have spoken up in support of the Clean Power Plan—along with power companies and leading brands like Apple, GE, and Walmart.

And more than 8 out of 10 Western voters—who work and live near the public lands affected by the methane waste rule—support the Department of Interior’s existing rule. More than two-thirds of voters across the country want to keep it.

We need to unequivocally show the Trump Administration and the world that Americans won’t stand to lose our safeguards.

That's why we've made it simple for you to speak out on *both* of these dangerous repeal efforts at once. Join the tens of thousands of EDF supporters who have already spoken out, and add your name today!

Thank you for standing with us,

Heather Shelby
