If you are a senior operating executive or know of one with over **15 years** of success, experienced in managing a P&L of **\$50 million** or greater, and have/has access to businesses in the industry with the potential for profitable growth, then **Blackmore Partners** can help acquire and run a Private Equity backed company.

Before proceeding, I need you to update your information in our database, here is a link to a form for you to complete. It takes 2 minutes. **Please [Click Here](#)**.

Our unique business model, well recognized in the investment community and within our large proprietary network, is to partner with successful executives on investment thesis in the low middle market.

Our acquisition target criteria includes:

1. family businesses whose owners seek to recapitalize or exit;
2. businesses in growing and fragmented industries that are unable on their own to capitalize on the growth and consolidation opportunity;
3. corporate divisions that do not fit in the parent company, and, thus are candidates for a corporate carve-out;
4. companies that have performance issues or are distressed and candidates for turnaround.

The prospective acquisition targets should generate at least **\$3 million** in operating profit or have a clear path to a turnaround.

We welcome company referrals, for which we pay referral fees upon the conclusion of the transaction.

And, we partner with successful executives on developing and realizing investment thesis, from soup to nuts.

**Blackmore Partners** is a Chicago-based Private Equity Independent Sponsor

firm, founded in 2005, that partners with senior executives to build successful businesses and create unique opportunities to deploy capital for well above industry-norm growth and multiple accretion.

For more information, please visit [our website](#) and follow us on [our LinkedIn](#) to stay tuned about C-level positions (follow us on the top right-hand corner).

Be aware, my network is yours, be sure I am your first LinkedIn connection by adding me via [this link](#).
